FOOD CONTACT

BYK Regulatory Information

BYK-MAX NU 4232

Summary

BYK-MAX NU 4232 is suitable for food contact applications under the following compositional provisions:

Plastics		
Europe	Regulation (EU) No. 10/2011	Yes

This summary reflects only the regulations assessed to date and does not preclude permitted uses in other regions or applications. Please refer to the explanation section below for detailed information on the regulations and assessment criteria considered.

Explanation

Plastic
EUROPE

Commission Regulation (EU) No 10/2011 on plastic materials and articles intended to come into contact with food, as amended as of the date of this document.

This product is manufactured with substances listed in Annex I - Table I of Regulation (EU) No 10/2011 or subject to derogation as per Article 6(3). One substance with a specific migration limit (SML) is considered proprietary information. Further information can be provided upon request.

This product contains a substance that is also authorized for use as a food additive under Regulation (EC) No 1333/2008 and identified by the following entry:

- Sodium, potassium and calcium salts of fatty acids, E 470a

Based on the current knowledge of the product composition, product specifications, and information provided by raw material suppliers, residues of substances listed in Annex II with restrictions and/or substances for which genotoxicity has not been ruled out are not known or expected to be present in concentration exceeding the specific migration limits established by this regulation. Testing is not routinely performed for substances that are neither identified nor reasonably expected to be present.

In accordance with our role as a manufacturer of substances, non-intentionally added substances (NIAS) which have become known to us are assessed in accordance with internationally recognized scientific principles of risk assessment to ensure compliance with the requirements of Article 3(1)(a) of Regulation (EC) No 1935/2004. The assessments are carried out under the assumption that this product is used in accordance with BYK's recommendations for food contact applications and/or under normal or foreseeable conditions of use, and considering the following parameters: 100% migration, 1kg food in contact with 6 dm^2 of packaging, film thickness 1mm.

General Remarks

Regulations apply within the context of respective regional framework regulations, e.g. Regulation (EU) No. 1935/2004 and FDA 21 CFR 174.5. Please note that it is the responsibility of both manufacturers of finished food contact articles and downstream business operators to ensure compliance with the applicable migration limits and restrictions of the finished materials or articles under specific real and/or foreseeable conditions of use.

Since traces of unknown processing aids cannot be fully excluded, compliance with general requirements is the responsibility of the end user.
