

## BYK GS-393

Modified alkoxyated amine used in demulsifier formulations for dewatering and desalting crude oil and natural gas condensates. It is typically blended with other demulsifier bases and/or inhibitors and diluted with aromatic solvents or alcohols.

### Product Data

#### Composition

Alkoxyated amine

#### Typical Properties

The values indicated in this data sheet describe typical properties and do not constitute specification limits.

Appearance: Clear to slightly hazy liquid  
 Flash point: > 66 °C  
 Viscosity (25 °C): 1750 mPa·s  
 Relative solubility number (RSN): 6.0

### Applications

#### Oil & Gas Industry

#### Special Features and Benefits

BYK GS-393 is a modified alkoxyated amine used in demulsifier formulations for dewatering and desalting crude oil and natural gas condensates. BYK GS-393 is typically blended with other demulsifier bases and/or inhibitors and diluted with aromatic solvents or alcohols. BYK GS-393 is an effective water dropper, interphase treater, and finishing compound; it is cost effective and highly concentrated.

#### Recommended Use

Demulsifier/Water Dropper	■
Desalting	■

■ especially recommended    □ recommended

#### Recommended Levels

Dosage range will typically range from 5-500 ppm evaluated in laboratory or field tests.

The above recommended levels can be used for orientation. Optimal levels are determined through a series of laboratory tests.
