

## BYK GS-64

Concentrated polyether polyol used to break emulsions in high gravity crudes, improve the oil/water interface, and improve water clarity.

### Product Data

#### Chemical Composition

Polyether polyol

#### Typical Properties

The values indicated in this data sheet describe typical properties and do not constitute specification limits.

Solubility:	Water soluble
Appearance:	Clear liquid
Density (16 °C):	1.02 g/ml
Flash point:	149 °C
Relative solubility number (RSN):	17.5

### Applications

#### Oil & Gas Industry

BYK GS-64 is a concentrated polyether polyol used to break emulsions in high gravity crudes, improve the oil/water interface, and improve water clarity. BYK GS-64 is typically blended with other demulsifier bases and/or inhibitors and diluted with aromatic solvents or alcohols. BYK GS-64 is an effective water dropper and interphase treaters; it is cost effective and highly concentrated.

#### Special Features and Benefits

#### Recommended Use

Demulsifier/Water Dropper	■
Desalting	■

■ especially recommended    □ recommended

#### Recommended Levels

Dosage range will typically range from 5-500 ppm evaluated in laboratory or field tests.

The above recommended levels can be used for orientation. Optimal levels are determined through a series of laboratory tests.
